Validation Bug - QM2643-61

QA Manual (10.04.2026) Даченко / QM2643-61

7 of 10

Donation is processed successfully with incorrect cardholder name

EditAdd commentAssignMoreprogress

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw10-kittensStatus:TO DO (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Preconditions:

- User is on the Donate page
- A card has been added

Steps to Reproduce:

- Enter a cardholder name that does not match the card data
- Fill in the remaining payment fields with valid data
- Check the confirmation checkbox
- Click "Confirm payment"

Expected Result:

- The system should display an error message
- Donation/payment should not be processed
- A failure pop-up should appear

Actual Result:

- The system accepts incorrect cardholder name
- Donation/payment is processed successfully
- A success pop-up with "Thank you" message appears

Security Bug - QM2643-67

QA Manual (10.04.2026) Даченко / QM2643-67

1 of 10

Sensitive card data is not masked in web and mobile versions

EditAdd commentAssignMoreprogress

Details

Type:BugPriority:MediumAffects Version/s:NoneComponent/s:NoneLabels:hw10-kittensStatus:TO DO (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Preconditions:

- User has at least one created virtual card
- Account page is open

Steps to Reproduce:

- Open the web version of the application
- Go to the Account page
- Observe displayed card information
- Open the mobile responsive version of the application
- Observe displayed card information on mobile resolution

Expected Result:

- Part of the card number should be masked (example: **** * 1234)
- CVV should not be displayed
- Sensitive card data should be protected in both web and mobile versions

Actual Result:

- Full card number is displayed in the web version
- Full card number is displayed in the mobile version
- CVV code is visible on the card in both versions
- Sensitive payment data is exposed to the user

Business Logic Bug - QM2643-63

QA Manual (10.04.2026) Даченко / QM2643-63

5 of 10

Payment is processed without selecting mandatory consent checkbox

EditAdd commentAssignMoreprogress

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw10-kittensStatus:TO DO (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Preconditions:

- User is on the Donate page
- All payment fields are filled correctly

Steps to Reproduce:

- Fill in all payment fields with valid data
- Leave the consent/privacy checkbox unchecked
- Click "Confirm payment"

Expected Result:

- Payment should not be processed without user consent
- The "Confirm payment" action should remain disabled or an error message should appear
- The consent checkbox should be mandatory

Actual Result:

- Payment is processed successfully without selecting the consent/privacy checkbox
- No validation or warning message appears
- User consent is not required to complete payment

UI Bug - QM2643-65

QA Manual (10.04.2026) Даченко / QM2643-65

3 of 10

Mobile layout breaks when 4 cards are displayed on the Account page

EditAdd commentAssignMoreprogress

Details

Type:BugPriority:MediumAffects Version/s:NoneComponent/s:NoneLabels:hw10-kittensStatus:TO DO (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Preconditions:

- Mobile view is enabled
- User has added 4 cards

Steps to Reproduce:

- Open the application in mobile view
- Add 4 cards
- Scroll through the Account page

Expected Result:

- All cards should be fully visible
- UI elements should fit inside the mobile viewport
- No content should be cropped or overlapped

Actual Result:

- The 4th card is partially cropped
- Card layout exceeds the mobile viewport
- UI becomes visually broken on mobile resolution

Type: UI / Responsive
