TC_ACC_004	Checking if the card removal window is open	The user is on the Account page. A card has been added.	1. Click the "Remove Card" button	A pop-up window titled "Deleting a card" appears
TC_ACC_005	Checking the card balance	The user is on the Account page. A card has been added.	1. Check your card balance	The balance is displayed on the card. By default, the balance is 0 when the card is created.

Generating a new card (pop-up) + Errors + Card view after adding

ID	Title	Preconditions	Steps	Expected Result
TC_CARD_001	Checking if the Add Card window is open	The user is on the Account page	1. Tap the "+" button	A pop-up window titled "Generating a new card" appears
TC_CARD_002	Checking if a window has been closed using the "X" button	The Add Map window is open	1. Click the "X"	The window closes. The user returns to the Account page.
TC_CARD_003	Validation of input data (First/Last name)	The Add Map window is open	1. Enter "Mark" и "Zuckerberg"	The fields accept values
TC_CARD_004	Checking for	The window is open	1. Enter "Mark123"	The field does not accept a

	prohibited characters in the name			value or displays an error
TC_CARD_005	Checking for special characters	The window is open	1. Enter "Mark!"	The field does not accept a value or an error has occurred
TC_CARD_006	Check for minimum length (1 character)	The window is open	1. Enter "n"	Error or invalid field
TC_CARD_007	Checking for maximum length (>20 characters)	The window is open	1. Enter a long name (more than 20 characters)	The limit is triggered
TC_CARD_008	Checking for an inactive button when fields are empty	The window is open	1. Do not enter any data	The "Create a virtual card" button is disabled
TC_CARD_009	Checking button activation with valid data	The window is open	1. Enter a valid first and last name	The button becomes active
TC_CARD_010	Verifying Map Creation	The window is open, and valid data has been entered	1. Click "Create a virtual card"	The card is created and appears in the list
TC_CARD_011	Checking whether the form has been cleared after closing	Open the window > close it > open it again	1. Enter the data; 2. Close the window; 3. Open it again.	The fields are empty
TC_CARD_012	Checking the behavior of the "+" button when the card limit is reached (Main page)	The user already has 5 cards	1. Tap "+"	- The "+" button is disabled OR - A limit message is displayed - The pop-up does not open
TC_CARD_013	Error check: First name/last name is less than 2 characters	The Add Map window is open	1. Enter "A" in the First Name field; 2. Enter a valid Last Name.	The following error is displayed: "should be more than 2 symbols". The button is disabled.
TC_CARD_014	Error check: First name/last name is more than 20 characters long	The window is open	1. Enter a first or last name longer than 20 characters	The following error is displayed: "should be less than 20 symbols" or input is limited
TC_CARD_015	Error check: empty "First name" field	The window is open	1. Leave the "First name" field blank; 2. Enter a valid "Last name".	The following error is displayed: "First/Last name required". The button is disabled.
TC_CARD_016	Error check: empty "Last name" field	The window is open	1. Enter a valid first name; 2. Leave the last name	The following error is displayed: "First/Last name required". The button is

			field blank.	disabled.
TC_CARD_017	Error check: non-Latin characters	The window is open	1. Enter "Mark" or "123" in any field.	The following error is displayed: "Only a-z symbols." The button is disabled.
TC_CARD_018	Error check: entering special characters	The window is open	1. Enter "Mark!@#".	An error is displayed, or the field does not accept input
TC_CARD_019	Checking for the simultaneous display of multiple errors	The window is open	1. Enter "1" in the First Name field; 2. Enter "!" in the Last Name field.	The correct error messages are displayed for each field
TC_CARD_020	Checking the text for errors	The window is open	1. Enter invalid data	The error message meets the requirements (no typos)
TC_CARD_021	Checking the location of the error	The window is open	1. Enter invalid data	The error is displayed next to the corresponding field
TC_CARD_022	Error color check	The window is open	1. Enter invalid data	The error is displayed visually (in red)

Issues & Observations (Card view after adding)

ID	Type	Title	Description	Expected Result
ISSUE_CARD_SEC_001	Security	Entry and processing of confidential card data	On the "Card view after adding", the user can see the card number, CVV code, and expiration date	Sensitive data protection: It is recommended to hide sensitive card data after card creation: - Card number should be partially masked (e.g. **** **** **** 1234) - CVV code should not be displayed at all

Card replenishment

ID	Title	Preconditions	Steps	Expected Result
TC_REPL_001	Checking if the card top-up window is open	The user is on the Account page. A card has been added.	1. Tap the "+" button on the added map	A "Card Replenishment" pop-up window opens
TC_REPL_002	Checking whether the deposit window	The "Card Replenishment" window is open	1. Click "X"	The window closes. The user is redirected to the Account page

	has been closed by clicking the "X"			
TC_REPL_003	Checking the inactive "Add Money" button by default	The "Card Replenishment" window is open	1. Do not enter an amount	The "Add Money" button is disabled
TC_REPL_004	Check if the button is enabled when the amount is valid	The "Card Replenishment" window is open	1. Enter a valid amount, such as "100"	The "Add Money" button becomes active
TC_REPL_005	Verifying that the card has been successfully reloaded with a valid amount	The "Card Replenishment" window is open. The card balance is 0.	1. Enter "100"; 2. Click "Add money".	The window closes. The card balance increases by 100
TC_REPL_006	Check if the top-up restriction is set to 0	The "Card Replenishment" window is open	1. Enter "0"	The "Add Money" button is disabled or an error message appears. The deposit cannot be processed.
TC_REPL_007	Checking for a negative sum	The "Card Replenishment" window is open	1. Enter "-100"	The field does not accept a value or an error is displayed. The top-up is not processed
TC_REPL_008	Checking for invalid characters in the amount field	The "Card Replenishment" window is open	1. Enter "abc"	The field does not accept letters, or an error is displayed. The button is disabled.
needs clarification				
TC_REPL_009	Checking the threshold value of 10,000	The "Card Replenishment" window is open	1. Enter 10,000; 2. Click "Add money"	If the 10,000 limit is correct, the deposit is processed successfully
TC_REPL_010	Check for exceeding the deposit limit	The "Card Replenishment" window is open	1. Enter "10001"; 2. Click "Add money"	If the 10,000 limit is correct, the top-up will not be processed and an error will be displayed
TC_REPL_011	Checking the threshold value of 100,000	The "Card Replenishment" window is open	1. Enter "100,000"; 2. Click "Add money"	If the limit of 100,000 in the main documentation is correct, the top-up is successful
TC_REPL_012	Check for exceeding the 100,000 limit	The "Card Replenishment" window is open	1. Enter "100,001"; 2. Click "Add money"	The top-up cannot be processed. An error indicating that the limit has been exceeded is displayed.
TC_REPL_013	Checking your balance after a	The user has a card with a balance of 0	1. Select "Top Up" 2. Enter 500	The card shows the updated balance: 500

	deposit		3. Click "Add Money"	
TC_REPL_014	Verifying a card reload	The user has a card with a balance of 500	1. Add another 300 to your card	The card balance becomes 800

Issues & Observations (Card replenishment)

ID	Type	Title	Description	Expected Result
ISSUE_REQ_001	Requirement	Discrepancy in the deposit limit	The requirements specify 100,000, while the UI shows 10,000	The requirements must be agreed upon
ISSUE_UI_002	UI	Incorrect button text	The button is labeled "Add moneys"	It should say "Add money"

Deleting a card

ID	Title	Preconditions	Steps	Expected Result
TC_DEL_001	Checking whether the window closes when the "X" is clicked	The "Deleting a card" window is open	1. Click "X"	The window closes. The card is not deleted.
TC_DEL_002	Validating the text in the delete dialog box	The window is open	1. View the text	The text reads: "Are you sure you want to delete this card?"
TC_DEL_003	Testing the delete confirmation button	The window is open	1. Click "Yes, delete card"	The card is being removed. The window is closing.
TC_DEL_004	Verify that the card cannot be deleted without confirmation	The window is open	1. Close the window by clicking the "X"	The card remains on the list
TC_DEL_005	Verifying that the card has been removed from the list	The user has a card	1. Remove the card via the pop-up	The card disappears from the list

Donate tab

ID	Title	Preconditions	Steps	Expected Result
TC_DON_001	Checking whether all fields are required	The user is on the Donate page	1. Leave one or more fields blank; 2. Click "Confirm payment".	The payment cannot be processed. An error message stating "Field name is required" appears for empty fields.
TC_DON_002	Verifying a successful donation with valid information	The user is on the Donate page. A card with a balance has been added.	1. Enter the information that matches the card you added; 2. Enter a valid amount; 3. Check the consent box; 4. Click "Confirm payment".	The payment has been successfully processed. A "Thank you" pop-up appears.
TC_DON_003	Check for a mismatch in the cardholder's name	The user is on the Donate page. A card has been added.	1. Enter a name that does not match the information on the card; 2. Fill in the remaining fields correctly; 3. Check the box; 4. Click "Confirm payment".	A pop-up window appears saying "Transaction failed, try again." The payment is not processed.
TC_DON_004	Checking for a mismatch in the card number	The user is on the Donate page. A card has been added.	1. Enter a card number that is different from the one already on file; 2. Fill in the remaining fields correctly; 3. Check the box; 4. Click "Confirm payment".	A pop-up window appears saying "Transaction failed, try again." The payment is not processed.
TC_DON_005	Checking for a mismatch in the card's expiration date	The user is on the Donate page. A card has been added.	1. Enter an expiration date that is different from the one on the added card; 2. Fill in the remaining fields; 3. Check the box; 4. Click "Confirm payment".	A pop-up window appears saying "Transaction failed, try again." The payment is not processed.
TC_DON_006	CVV Mismatch Check	The user is on the Donate page. A card has been added.	1. Enter a CVV that does not match the card on file; 2. Fill in the remaining fields correctly; 3. Check the box; 4. Click "Confirm payment".	A pop-up window appears saying "Transaction failed, try again." The payment is not processed.

TC_DON_007	CVV Format Validation	The user is on the Donate page. A card has been added.	1. Enter a CVV code with fewer or more than 3 digits; 2. Fill in the remaining fields; 3. Click "Confirm payment".	The error "CVV should contain three digits" appears. The payment is not processed.
TC_DON_008	Card Number Format Validation	The user is on the Donate page	1. Enter a card number with fewer than 16 digits; 2. Fill in the remaining fields; 3. Click "Confirm payment".	The error "Should be 16 digits long" appears. The payment is not processed.
TC_DON_009	Checking the card's expiration date	The user is on the Donate page	1. Enter the date in a format other than MM/YY; 2. Fill in the remaining fields; 3. Click "Confirm payment".	The error "Date should be in MM/YY format" appears. The payment is not processed.
TC_DON_010	Check if the donation amount is greater than 0	The user is on the Donate page	1. Enter 0 or a negative number in the Amount field; 2. Fill in the remaining fields; 3. Click "Confirm payment".	The error "Amount must be greater than 0" appears. The payment is not processed.
needs clarification				
TC_DON_011	Checking the maximum donation amount of "50,000"	The user is on the Donate page. There is a card with sufficient funds.	1. Enter the amount 50,000; 2. Fill in the remaining fields correctly; 3. Check the box; 4. Click "Confirm payment".	The payment has been successfully processed. A "Thank you" pop-up appears.
TC_DON_012	Check for Exceeding the Maximum Donation Amount	The user is on the Donate page	1. Enter the amount 50001; 2. Fill in the remaining fields correctly; 3. Check the box; 4. Click "Confirm payment".	The payment cannot be processed. The error message "Transactions exceeding 50,000 are not allowed" appears.
TC_DON_013	Checking the consent checkbox	The user is on the Donate page. All fields have been filled out correctly.	1. Do not check the box; 2. Click "Confirm payment".	The payment is not going through. An error message appears, or the button remains inactive.
TC_DON_014	Checking the link to the "Terms of Service"	The user is on the Donate page	1. Click the "Terms of Service" link	A document/page containing the data processing terms and conditions will open
TC_DON_015	Verifying the	The user is on the	1. Make a successful	A "Thank you" pop-up

	display of the “Thank you” pop-up after a successful payment	Donate page. All data is valid.	donation	appears
TC_DON_016	Checking whether the “Transaction failed” pop-up appears when data does not match	The user is on the Donate page	1. Enter information that does not match the card you added; 2. Click “Confirm payment”.	A pop-up appears saying “Transaction failed, try again”

Issues & Observations (Donate tab)

ID	Type	Title	Description	Expected Result
ISSUE_DON_SEC_001	Security	Entry and processing of confidential card data	On the Donate page, the user enters their card number, CVV, and expiration date	Data must be processed securely; the CVV must not be stored or displayed after it is entered
ISSUE_DON_REQ_001	Requirement	Behavior when no card is present is not specified	The instructions state that the donation is made using a linked card, but do not specify what happens if there are no cards	Please clarify: it should not be possible to make a donation without adding a card, and a clear message should be displayed
ISSUE_DON_REQ_002	Requirement	Discrepancy in the maximum donation amount	The general description states that the maximum balance on the card is 100,000, while the “Donate” section specifies a limit of 50,000	The requirements must be agreed upon: determine a single maximum donation limit (50,000 or 100,000)

Mobile version — additional checks

ID	Title	Preconditions	Steps	Expected Result
TC_MOB_001	Checking how the app appears on a mobile screen	The mobile version is now available	1. Open the app on your mobile device	All elements are displayed correctly; nothing is cropped or overlaps
TC_MOB_002	Testing on iOS	I have an iOS device/emulator	1. Open the app; 2. Test the main scenarios: Account, Add Card, Replenishment, Donate.	The core functionality works correctly on iOS

TC_MOB_003	Testing on Android	There is an Android device/emulator	1. Open the app; 2. Test the main scenarios.	The core functionality works correctly on Android
TC_MOB_004	Testing the responsiveness of pop-up windows	The mobile version is now available	1. Open the card addition pop-up; 2. Open the top-up pop-up; 3. Open the deletion pop-up.	The pop-up appears on the screen, the buttons are accessible, and the text is readable
TC_MOB_005	Testing button responsiveness	The mobile version is now available	1. Tap Account/Donate; 2. Tap "+"; 3. Tap Delete; 4. Tap Confirm payment.	All buttons are easy to press, and there are no accidental presses of adjacent controls
TC_MOB_006	Checking the mobile keyboard for fields	The Donate or Replenishment form is now available	1. Click on the "Card number," "CVV," and "Amount" fields	A numeric keypad appears for numeric fields
TC_MOB_007	Checking page scrolling	The mobile version is now available	1. Scroll down the Account and Donate page	The scroll function works correctly, users can access all elements
TC_MOB_008	Checking the screen orientation	The mobile version is now available	1. Switch between portrait and landscape	The interface remains functional, and all elements remain accessible
TC_MOB_009	Checking card data masking in the mobile version	Card added	1. Open an Account on the mobile version	Part of the card number is hidden; the CVV is not displayed
TC_MOB_010	Checking the "terms of service" link on the mobile version	The Donate page is now open	1. Click "Terms of Service"	The document opens correctly and is readable

Issues & Observations (Mobile version)

ID	Type	Title	Description	Expected Result
ISSUE_MOB_SEC_001	Security	Entry and processing of confidential card data	Same security concern as in web version: on mobile, user enters card number, CVV, and expiration date.	Sensitive data must be processed securely; CVV must not be stored or exposed at any time. Card number should be masked (e.g. **** * 1234).
ISSUE_MOB_UX_002	UX Suggestion	Move informational block above donation form	On mobile screens, the informational section ("Help our kittens to be happier...") is displayed after the payment form. This	The informational block should appear before the payment form to provide context and improve user experience.

			may reduce clarity of the donation flow and user guidance.
