Validation - QM2643-258

QA Manual (10.04.2026) Дяченко / QM2643-258

Incorrect initial mileage value is used in Fuel Expense validation

EditAdd commentAssignMoreprogress

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:TO DO (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

EnvironmentQA Auto ApplicationUser: Guest UserBrowser: Chrome

Preconditions

- Guest mode is active.
- Audi TT is added to Garage.
- Vehicle mileage displayed in Garage is 300 km.

Steps to Reproduce

- Open Garage page.
- Verify that Audi TT mileage is 300 km.
- Open Fuel Expenses.
- Click **Add an expense** for Audi TT.
- Enter mileage value **303**.
- Fill other required fields.
- Click **Add**.

Actual Result

The application displays the validation error:

"New expense mileage must not be less or equal to car initial mileage. Car initial mileage is 400"

The system uses mileage value **400**, which does not match the actual vehicle mileage displayed in Garage (**300**).

Expected Result

The system should validate the entered mileage against the actual vehicle mileage stored for the selected car.

For Audi TT with mileage **300**, mileage **303** should be accepted, or the validation message should reference the correct mileage value (**300**).

UI / Responsive - QM2643-209

QA Manual (10.04.2026) Дяченко / QM2643-209

User side menu is not displayed on mobile version

EditAdd commentAssignMorein prog

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:RE-OPENED (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Steps to Reproduce:

- Open the application
- Open DevTools
- Enable mobile device view
- Open the User ** Profile section
- Check the side menu

Actual Result:

The side menu in the User section is not displayed on the mobile version. As a result, the user cannot access the sections listed in the side menu.

Expected Result:

The side menu of a mobile alternative menu should be displayed. The user should be able to access all available profile sections on mobile.

QA Manual (10.04.2026) Дяченко / QM2643-208

User cannot change email because new email is incorrectly detected as already existing

EditAdd commentAssignMoreRe-open

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:DONE (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Steps to Reproduce:

- Open the Settings page
- Enter a new valid email address that is not used before
- Enter the valid current password
- Click Change email

Actual Result:

Every time a new email address is entered, the system shows the error: "Email already exists"

The email address is not changed.

Expected Result:

The email should be changed successfully when a new valid email and the correct current password are entered. The success message "Email has been changed" should be displayed.

QA Manual (10.04.2026) Дяченко / QM2643-207

Settings page returns 404 Page not found

EditAdd commentAssignMoreRe-open

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:DONE (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Steps to Reproduce:

- Open the Settings page
- Observe the page content

Actual Results:

The system displays 404 Page not found.

Expected Result:

The Settings page should be displayed correctly. The following sections should be visible: Currency, Units of distance, Change email, Change password, and Remove account.

Functional - QM2643-206

QA Manual (10.04.2026) Дяченко / QM2643-206

Incorrect instructions are displayed for selected car model

EditAdd commentAssignMoreRe-open

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:DONE (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Steps to Reproduce:

- Open the Instructions page
- Select brand Audi
- Select model A6
- Click the Search button

Actual Result:

The system displays instructions for BMW 3 Series instead of instructions for Audi A6. Also, 13 instruction files are displayed, which is more than the expected 8 files per page.

Expected Result:

The system should display only instructions related to Audi A6. If more than 8 files are found, only 8 files should be displayed on one page and pagination should be shown.

User cannot save car changes due to "Not authenticated" error

EditAdd commentAssignMoreRe-open

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:DONE (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Preconditions:

User is logged in. At least one car is added to Garage.

Steps to Reproduce:

- Open the Garage page.
- Click the **Edit** icon for any car.
- Change valid car data, for example Mileage.
- Click the **Save** button.

Actual Result:

The changes are not saved. The application displays the error message:

Not authenticated

The Edit a car popup remains opened.

Expected Result:

The edited car data should be saved successfully. The popup should be closed, and the updated data should be displayed in the car card.

QA Manual (10.04.2026) Дяченко / QM2643-197

User cannot add Audi A6 car to Garage

EditAdd commentAssignMoreRe-open

Details

Type:BugPriority:HighAffects Version/s:NoneComponent/s:NoneLabels:hw13-qaautoStatus:DONE (View Workflow)Resolution:UnresolvedFix Version/s:None

Description

Steps to reproduce:

- Open Garage page
- Click add car button
- Select brand Audi
- Select model A6
- Fill in all required fields with valid data
- Click the Add button

Actual Results:

The car is not added to the garage. The system shows the error: **Data truncated for column 'userid' at row 1**

Expected Results:

The Audi A6 car should be added successfully to the Garage when all required fields are filled with valid data.
